SCORE **%**

JOURNEYMAN OPEN BOOK EXAM #6 25 Questions One Hour Time Limit

1. Which of the following wiring methods is not permitted in the ceiling space used as a return-air plenum?

- (a) PVC (b) MI cable (c) AC cable (d) IMC conduit

2. The ampacity of a conductor is the current, in amperes, that the conductor can carry continuously under the conditions of use without exceeding its ____ rating.

- (a) insulation (b) inductive (c) voltage (d) temperature

3. A copper-coated steel ground rod shall be at least ____.

- (a) 3/8" (b) 1/2" (c) 9/16" (d) 5/8"

4. Shore power for boats shall be provided by single receptacles rated not less than ____ amperes.

- (a) 15 (b) 20 (c) 25 (d) 30

5. Overhead conductors not over 1,000 volts pass over a public driveway, they shall have a minimum clearance of not less than ____ feet above finished grade.

- (a) 10 (b) 12 (c) 15 (d) 18

6. Where a rock bottom is encountered, the ground rod shall be permitted to be buried in a trench that is at least ____ deep.

- (a) 2 1/2 feet (b) 3 feet (c) 24" (d) 48"

7. Instruments, pilot lights, voltage transformers, and other switchboard or switchgear devices with potential coils shall be supplied by a circuit that is protected by standard overcurrent devices rated ____ amperes or less.

- (a) 30 (b) 20 (c) 15 (d) 25

8. Direct buried conductors emerging from grade shall be protected by enclosures or raceways up to a point at least ____ above finished grade.

- (a) 8' (b) 10' (c) 12' (d) 22"

9. The controller disconnecting means for a motor, and the motor is not in sight of the disconnecting means, the following is required ____.

- (a) the driven machinery location must be located closer to the disconnect**
- (b) the disconnecting means shall be lockable in the open position**
- (c) the disconnecting means must be readily accessible**
- (d) the disconnecting means shall be an isolating switch**

10. What is the full load current of a 50 horsepower, 3 ϕ , 480v, wound rotor, AC motor?

- (a) 104 amps**
- (b) 52 amps**
- (c) 65 amps**
- (d) 41 amps**

11. In panelboards, fuses of any type shall be installed on the ____ side of any switches.

- (a) positive**
- (b) negative**
- (c) load**
- (d) line**

12. What is the minimum size equipment grounding conductor for a 50 amp rated branch circuit?

- (a) #14**
- (b) #12**
- (c) #10**
- (d) #8**

13. Liquidtight flexible metal conduit (LFMC) shall be securely fastened in place by an approved means within ____ of each box, cabinet, conduit body, or other conduit termination.

- (a) 8"**
- (b) 12"**
- (c) 16"**
- (d) 24"**

14. Conduit nipples not over 24" in length may be filled to a maximum of ____ of their CSA.

- (a) 50%**
- (b) 60%**
- (c) 70%**
- (d) 80%**

15. The interior of raceways installed underground shall be considered a/an ____ location.

- (a) buried**
- (b) isolated**
- (c) damp**
- (d) wet**

16. Rigid PVC, size 1 1/2" shall be supported every ____.

- (a) 18"**
- (b) 36"**
- (c) 5 feet**
- (d) 8 feet**

17. Flat conductor cable (FCC) individual branch circuits shall have ratings not exceeding ____.

- (a) 30 amps**
- (b) 25 amps**
- (c) 20 amps**
- (d) 15 amps**

18. A battery room where batteries are being charged, requires ventilation to prevent ____.

- (a) corrosion**
- (b) electrostatic charge**
- (c) acid corrosion**
- (d) an explosive mixture**

19. A single ground rod that does not have a resistance to ground of 25 ohms or less, can be supplemented by which of the following?

(a) Ground ring (b) Concrete encased electrode (c) Metal frame of building (d) Any of these

20. Openings around electrical penetrations into or through fire-resistant-rated walls, partitions, floors, or ceilings shall be firestopped using ____ methods to maintain the fire resistance rating.

(a) suitable (b) listed (c) identified (d) approved

21. Panelboards equipped with snap switches rated at 30 amperes or less shall have overcurrent protection of ____ amperes or less.

(a) 30 (b) 60 (c) 100 (d) 200

22. Type MC cable shall be permitted to be unsupported and unsecured where the cable is not more than ____ in length from the last point of connection to luminaires.

(a) 36" (b) 48" (c) 60" (d) 72"

23. Underground wiring within ____ horizontally from the inside wall of the pool shall be permitted in liquidtight flexible metal conduit listed for direct burial use.

(a) 18" (b) 24" (c) 48" (d) 60"

24. Branch circuits shall be rated in accordance with the ____.

**(a) ampere rating of the largest receptacle
(b) maximum permitted rating of the fuse or breaker
(c) number of receptacle outlets in the branch circuit
(d) ampere rating of the largest conductor**

25. Color coding shall be permitted to identify intrinsically safe conductors where they are colored ____ and where no other conductors of the same color are used.

(a) pink (b) light blue (c) yellow (d) purple
