

Journeyman Final Exam Answers

Journeyman Final Exam #2 - ANSWERS

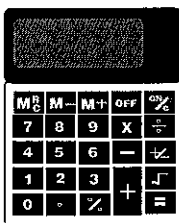

- | | |
|--|--|
| 1. (b) 600 volts | 525.5(B)(2) |
| 2. (a) PVC | 300.22(C)(1) |
| 3. (d) 5/8" | 250.52(A)(5)(2) |
| 4. (d) 30 amps | 555.33(A)(4) |
| 5. (a) 2 1/2 feet | 250.53(A)(4) |
| 6. (b) Sign Body | DEF 100 |
| 7. (c) corrosive residues | 110.12(B) |
| 8. (a) disconnect | 225.37 |
| 9. (d) Maximum Water Level | DEF 100 |
| 10. (a) minimum | 210.11(A) |
| 11. (a) infinite | •General Knowledge |
| 12. (d) all of these | •General Knowledge |
| 13. (a) equal to | •General Knowledge |
| 14. (a) heater output will decrease | •General Knowledge |
| 15. (c) more turns than the secondary | •General Knowledge |
| 16. (c) voltage across each branch is equal | •General Knowledge |
| 17. (c) inductive | •"ELI the ICE man" |
| 18. (c) effective | •General Knowledge |
| 19. (c) 30Ω | • $5\Omega \times 3 = 15\Omega \div .5 = 30\Omega$ |
| 20. (d) 20 amp circuits - #16 AWG & larger | 240.5(B)(4) |
| 21. (d) conspicuously | 305.12 |
| 22. (b) corrosive | 250.62 |
| 23. (a) Type 4 X | Table 110.28 |
| 24. (c) | Table 314.16(B)(1) |
| 25. (b) open | 225.19(A) |
| 26. (d) designed | 250.12 |
| 27. (d) | Chapter 9 Table 5 |
| 28. (b) | Table 220.56 |
| 29. (c) | Table 1, Chapter 9 |
| 30. (a) 1/4" | 600.4(C) |
| 31. (c) Induction | •General Knowledge |
| 32. (b) electrons passing a point per second | •General Knowledge |
| 33. (a) a loose connection | •General Knowledge |
| 34. (a) one-half cycle | •General Knowledge |
| 35. (c) current (shunt) | •General Knowledge |

Half way through the exam

Journeyman Final Exam Answers

Journeyman Final Exam #2 - ANSWERS

36. (c) one-half the resistance of one conductor	•General Knowledge
37. (b)	Table 430.52(C)(1)
38. (c) setting	210.18
39. (a)	Table 210.21(B)(2)
40. (c)	Table 235.360(A)
41. (b) a lampholder	100 DEF luminaire
42. (d) Red brass	344.10(A)(1)
43. (d) corrosion	300.5(F)
44. (b) threaded into hubs identified for the purpose	314.23(E)
45. (a) 10%	310.3
46. (c) grounded	Table 110.26 (A)(1) cond.2
47. (d) an orange triangle on the receptacle	406.3(E)
48. (d) 4 duplex or 8 single	517.18(B)
49. (b) 6' 6"	210.52(E)(3)
50. (c) nonshielded	305.4
51. (a) impedance	•General Knowledge
52. (c) 1/4 as much	•General Knowledge
53. (a) 1/2 cycle	•General Knowledge
54. (a) 90°	•General Knowledge
55. (c) Insulation of the Conductor	•General Knowledge
56. (a) inductive reactance exceeds the capacitive reactance	•General Knowledge
57. (b) .6875	• $11 \div 16 = .6875$
58. (b) cold	352.10 I.N.
59. (d) 16 feet	250.194(A)
60. (d) all of these	334.10(2)
61. (d) continuous load	422.13
62. (d) all of these	408.6
63. (d) integral to	230.85(B)(2)
64. (c) lockable	430.102(B)(2) ex.
65. (b) two	314.16(B)(4)
66. (b) interrupting	110.9
67. (c) overhead conductor spans	225.26 410.36(G)
68. (d) exhaust vapors	410.10(C)
69. (a) severe corrosive influences	344.14
70. (b) 3/4"	360.20(B)

After completing the exam, grade yourself by counting the correct number of questions and divide by the number of questions answered.

Example: 53 correct answers $\div$ 70 questions = 76%.
